Special Issue

The Application of Green Technology in the Modern Construction

Message from the Guest Editors

The Fourth Industrial Revolution is transforming industries throughout the world, including the construction industry. In an effort to optimize the efficiency of construction projects, emerging technologies are being actively implemented to reduce material waste and labor intensity. This era of transformation offers opportunities to enhance construction productivity and embrace environmentally sustainable practices, with environmentally sustainable construction leading the charge in mitigating environmental impact and ensuring long-term sustainability. In line with this, we welcome submissions that explore innovative approaches and applications in sustainable construction materials to further elaborate on these advancements in green construction. About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
