# Air Quality and GHG Emissions in Urban Environments

## Message from the Guest Editors

Nowadays, about 55% of the world's population lives in cities and this is foreseen to increase to 68% by 2050. The urban activities of such a large number of people in relatively small spaces cause a large amount of GHG emissions to be emitted, which cause climate change and other pollutants that cause air quality in cities to be harmful to human health. Thus, sustainable urban environments will only be possible with effective local measures tackling Greenhouse Gas (GHG) and other pollutant emissions that affect air quality. Cities are the engines of the countries' economies and are increasingly recognized as key players in World's transition toward a low-carbon economy. Thus, cities must move toward achieving low-carbon practices in all aspects including economy, and daily life (transport, energy, consumption, politics and culture, etc.) to lead a global sustainable change to improve living standards, promote innovation and reduce environmental impacts while maximizing economic and social co-benefits.

## **About the Journal**

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

## Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
