Educational Transformation Under the Sustainable Development Goals

Message from the Guest Editors

Digital education along with innovative approaches in education create positive effects on society and education. With today's technology, thanks to digital education tools, education continues to spread sustainability awareness by exceeding physical boundaries. The use of interactive learning tools and educational resources digitally allows individuals to be more flexible, sustainable, and accessible in the teaching process and contributes to a global sustainability perspective, both in terms of being less costly and more environmentally friendly. The aim of this Special Issue is to provide examples of effective and sustainable methods used in the learning and teaching process including innovative approaches such as augmented reality (AR), virtual reality (VR), artificial intelligence (AI), digital tools, massive open online courses (MOOCs), and gamification. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
