

Special Issue

Sustainable Materials Research and Technology: Utilizing Waste as a Resource in the Production of a New Generation of Green Materials

Message from the Guest Editors

The Special Issue focuses on harnessing waste as a resource in the development of green materials. In the face of pressing environmental concerns, this topic gains significance by addressing the urgent need for sustainable practices in material production. By repurposing waste materials, it not only minimizes the environmental impact associated with conventional production processes but also contributes to a circular economy. Its importance lies in the potential to reduce both emissions and energy consumption, offering innovative solutions for eco-friendly material synthesis. This approach aligns with the broader global imperative to transition towards greener alternatives, thus fostering a paradigm shift in material production that is essential for a more sustainable and resilient future.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
