

Special Issue

Smart Mobility for Sustainable Future Transportation

Message from the Guest Editors

Several avenues of progress have emerged with the aim of significantly improving the performance of transportation systems. Intelligent Transportation Systems (ITS), optimizing traffic management strategies to alleviate congestion and enhance overall transportation efficiency, are particularly noteworthy. Emerging transportation services such as ride sourcing, demand-responsive services, e-scooters, and other shared mobility solutions offer flexible motorized transit options, contributing to the micro-transit landscape. More recently, two paradigms have emerged as pivotal for sustainable transport development. The first one is Cooperative, Connected, and Automated Mobility (CCAM) paradigm and the second is Mobility as a Service (MaaS). In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Smart Infrastructure and Intelligent Transportation Systems (ITS);
- CCAM solutions;
- C-ITS;
- Automated and connected vehicles;
- Shared mobility systems;
- Mobility as a Service (MaaS);
- Smart and sustainable cities.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
