

Special Issue

Advancing Sustainable Development through Environmental, Behavioral, and Foresight Economics

Message from the Guest Editors

The intricate relationship between economic practices and sustainable development has never been more critical than it is now, in a rapidly evolving world of environmental challenges and economic transformations. As the planet faces unprecedented environmental crises, from climate change to resource depletion, there is an urgent need to redefine sustainability and reshape policymaking towards sustainable development that fosters quality of life. This aim goes beyond the standard definitions of sustainability and requires an interdisciplinary perspective and collaboration across disciplines. Therefore, this Special Issue seeks to deepen our understanding of how diverse economic practices and policies across the globe impact sustainable development, particularly in the context of the environmental challenges we face. This exploration is about identifying problems and uncovering opportunities for innovative economic strategies that can lead to more sustainable outcomes. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
