

Special Issue

Technological and Organizational Innovation for Sustainable Development

Message from the Guest Editors

The Special Issue (SI) aims to address the phenomenon of technological and organizational innovation – including ICT tools or hybrid organizational activity – that uses grassroots potential, entrepreneurship and technology in order to tackle social and environmental problems. These includes social enterprises, impact-tech start-ups, smart innovations for the common good, grassroots initiatives and participatory processes implementing innovations to tackle local environmental, health-related or socio-economic challenges. In the past decade, especially since the 2008 economic crisis, we are witnessing an increase in such types of activity, that gear themselves to provide creative solutions to the challenges the world, as well as local communities, currently face. These challenges have been conceptualized in 2015 by the UN General Assembly within a framework of 17 general goals, known as the Sustainable Development Goals (SDG) (<http://sdgs.un.org/>).

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
