

## Special Issue

# Digital Technologies for Sustainable Education

### Message from the Guest Editors

Education is currently undergoing a rapid transformation to meet the challenges and opportunities of digitalization. Advances in technology have made it possible for educational institutions to use digital learning materials, learning management systems, VR/AR solutions that help organize the study process, analyze data, and offer opportunities for all form of learning. In order to harness the enormous potential of the use of technology, it is necessary to develop new and innovative pedagogical concepts to promote the use of technological advances to add value to student learning outcomes. It is also essential to create synergies between technology opportunities, education systems, curriculum provision and pedagogical strategies ***This special issue will be dedicated to topical issues of digital solutions for sustainable education learning.*** It will establish an environment where to discuss ideas, problems, challenges and innovative solutions for changes in education which are brought by advanced technologies.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
