Technology and Innovation in Sustainable Shipping and Ports Management in Post Pandemic Era

Message from the Guest Editor

Maritime activities have been developed in recent years, which has reduced transport costs greatly. Meanwhile, automatic control technologies have involved in port operations much more than last decades. The competitiveness among ports has made hinterlands more overlapped. Thus, maritime transport has become a more practical and sustainable alternative options to original road transport. On the other hand, maritime transportation and port operation result in several environmental impacts, including water pollution, air pollution, carbon footprint, waster, noise pollution, and the reducing of ocean eco diversity.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
