

## Special Issue

# The Geography of Sustainable Tourism

### Message from the Guest Editors

In today's world, tourism is an important component of the lives of individuals and social groups. This means that every year, we observe an increase in the number of people taking part in tourism. As a result, the negative impact of tourism on the environment and culture also grows. The answer to these unfavorable phenomena and processes may lie in sustainable tourism which, on the one hand, aims at minimizing the negative impact of tourism and, on the other hand, supports development that brings positive experiences for entities operating in the tourism industry, local residents, and tourists. Of particular importance is that sustainable tourism applies to all forms of tourism in all types of tourist destinations, and its guidelines cover a wide range of aspects of tourism, including environmental, economic, and sociocultural aspects.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
