The Role of Science and Technology in Socio-Economic Sustainable Development

Message from the Guest Editor

Throughout history, science and technology have influenced the direction and pace of socio-economic development. Today, with dynamic advances of science and new technological applications, the impact of S&T on economic development, especially in advanced economies, is significant, leading to exponential growth of investment in R&D and innovation. Often, the main motivation behind these investments is the improvement of the competitiveness of the national economies. At the same time, the world is facing a number of global challenges. These include the impact of climate change, protection of biodiversity, digital and emerging technologies including artificial intelligence, sustainability of natural resources, food security, to distribution of global income and sustainable socio-economic development. The role of science and technology is essential in finding answers to these challenges. Yet, the key question is how to best support research, which will aim at these global challenges and provide input in sustainable socio-economic development.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
