

Special Issue

Think Tank in Tourism, Hospitality, Culture and Heritage: Towards Creativity and Innovation

Message from the Guest Editors

This Special Issue will focus on the central, but not exclusive, approach of creativity, innovation and sustainability. Beyond a sustainable economy, sustainable processes are becoming of key importance in the tourism sector as well, because the plannability of the sector requires solutions that are resilient in the long term. For this, the processes of globalization should be reassessed, and there is a growing need to explore the opportunities provided by cultural diversification. We look forward to receiving articles on any topic related to creativity and innovation in tourism, hospitality, heritage, and culture. Any interesting topics and themes are welcome connected with tourism responsibility and sustainability as well. We also welcome studies that look back to the historical past. There are no other strict thematic restrictions.
