

Special Issue

Inclusive Growth for Tourism Competitiveness

Message from the Guest Editors

Dear colleagues, Inclusion, disability, the aging population, and the marginalized people in tourism and leisure are increasingly important research areas due to the implications for tourism supply and demand, and enhancing tourism competitiveness. Tourism competitiveness can be defined as capabilities to establish a sustainable tourism system and induce inclusive growth through collecting tourism resources, creating tourism value, and implementing effective tourism policies in counties or provinces. In this context, this Special Issue seeks to shed further light on the main components of inclusive growth for tourism competitiveness.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
