

## Special Issue

# Sustainable Tourism Development and Economic Effects: Recent Advances and Challenges

### Message from the Guest Editor

This Special Issue aims to contribute to the sustainability literature by exploring the economic effects of sustainable tourism development. Sustainable tourism development is related to the environmental, economic, and sociocultural aspects, and a proper balance should be developed between these three dimensions to guarantee its long-term sustainability. Sustainability in tourism plays an important role for tourism planning and development. Tourism research has extensively analyzed tourism sustainability, but there is still a need to understand the economics aspects and consequences of sustainable tourism. Especially in the pandemic period, institutions, companies, regulatory bodies, and international organizations have now turned their gaze toward sustainability, which can emerge as a powerful tool from this highly uncertain period.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
