Sustainable Tourism Development and Economic Growth

Message from the Guest Editors

In the new context arising from the COVID-19 pandemic, institutions, companies, international organizations, NGOs, etc. have turned their gaze towards sustainability as a key paradigm to emerge stronger from this complex moment. World tourism has fallen to an unprecedented extreme low, and the recovery is expected to be slow—especially in those countries that depend heavily on international tourist flows. The aim of this Special Issue is to contribute to the generation of this knowledge, demonstrating that sustainable tourism can be an instrument not only of inclusive and sustainable economic growth, but also of development—that is, an instrument to improve the quality of life of the resident population through the creation of employment, improvement in the redistribution of wealth generated by tourism, social inclusion, and poverty reduction. For further reading, please visit the [Special Issue website](#).

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
