

## Special Issue

# Tourism Innovation and the SDGs

### Message from the Guest Editor

With tourism continuing to be seen as a driving force towards economic growth, inclusive development and environmental sustainability, how are global issues of sustainability being incorporated into tourism innovation and transformation? What are the trends, topics and challenges of tourism innovation from market, organizational, technological, local community and economic and social growth perspectives? This Special Issue aims to become a forum for the advancement of consideration of innovation towards sustainable tourism for our changing times. Papers that consider issues of critical perspectives such as climate action, peace and justice, leadership, governance, partnerships, technological advancement, gender, culture, tourism and hospitality work, research and education will be particularly welcome. Exploratory, empirical or conceptual papers are invited that contribute to the (re)consideration of tourism innovation. Multi-disciplinary and inter-disciplinary contributions are also encouraged to shed new insights into tourism innovation and the SDGs. Papers on all aspects of tourism, hospitality and supporting services and sectors will be considered.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
