

## Special Issue

# The Influence of Space on Tourist Activity: Supply, Demand, Competitiveness, Sustainability and Innovation

### Message from the Guest Editors

Dear colleagues, The objective of this Special Issue is to cover/compile the leading applied research at international level on methodologies applied to the relationship between tourism and space, demonstrating in this way that the analysis of tourism cannot be alien to its territorial component. Possible topic areas for this Special Issue might include but are not limited to the following:

- Univariate and bivariate spatial autocorrelation between tourism variables;
- Spatial clusters;
- Spatial interaction models;
- Cooperation (or competition) among tourism destinations;
- GIS geoprocesses applied to tourism;
- Geographical weighted regression;
- Distribution of tourism spatial point patterns;
- Spatiotemporal point processes in tourism;
- Movement patterns of tourists within a destination;
- Regional analysis of tourism;
- Creation of tourist itineraries.
