

Special Issue

Sustainability in Interaction of Traditional and Mechanical Financial Systems

Message from the Guest Editor

This special issue welcomes original academic contributions that conduct in-depth analysis on the sustainability of the nexus between the human and mechanical or digital character of financial activity. The authors should pay emphasis to sustainability in human-mechanical cooperation in payment systems. Light should be casted on whether the intertemporal connectedness between humans and technology has managed to preserve high levels of efficiency and prosperity. The sustainability of potential benefits generated by this nexus is of special interest in this breakpoint era of financial modernization.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
