

Special Issue

Traffic Flow Modelling and Simulation towards Sustainable Transportation

Message from the Guest Editors

The overall objective of this Special Issue of *Sustainability* is to collect original and innovative contributions focused on modeling and simulation methodologies/tools supporting the design and management of a greener, safer, and more equitable transportation system. Theoretical and applicative contributions may include, but are not limited to, the following areas:

- Connected and automated vehicles (solutions, market penetration, and real impacts on transport systems);
- Real-time vehicle management (technologies, methodologies, issues, solutions, and perspectives);
- Driving assistance technologies (issues, solutions, and perspectives);
- V2V and V2I communication (issues, solutions, and perspectives);
- Alternative fuel vehicles (solutions, market penetration, and environmental impact);
- Optimization of transportation systems;
- Simulation of transportation systems;
- Vehicle routing and route planning;
- Travel demand modeling and management;
- Real-time network optimization;
- Real-time public services optimization,
- Real-time signals setting design or traffic control;
- Mobility as a service,

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
