

## Special Issue

# Transition of Sustainable Agri-Food Supply Chains: Business and Governance Solutions from Agricultural Primary Production to Food Consumption

### Message from the Guest Editors

Policy trends and changing demand patterns towards sustainability goals are putting pressure on the food system, including on the actors of the agri-food supply chain and on consumers.

The aim of this Special Issue is to explore how agri-food value chain stakeholders and consumers trigger or adapt to the achievement of sustainability goals, including the analysis of connected policy frameworks and governance arrangements. Taking a multidisciplinary approach, articles may include the following topics:

- Policy and transition dynamics for agri-food systems;
- Circular economy and agro-ecological approaches in food supply chains;
- Sustainable and innovative business models in food systems;
- Evolving food consumption patterns in changing food systems;
- Alternative Food Networks activities, impacts and sustainable performance;
- Analysis and development of governance arrangements for agri-food value chains.

We look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
