

Special Issue

Sustainable Transport: Transport, Environment, and Development

Message from the Guest Editor

Transport is an important source of local, regional, and global pollution. In addition, given current technology, transport is likely to remain fossil fuel-intensive in the immediate future. However, transport is also strongly tied to both development and industrialization, and mobility is important for quality of life. This special issue will focus on sustainable transportation and transport and the environment, broadly defined. Papers might focus on the impact of transportation or the potential technical and/or institutional solutions. The level of analysis could be local, regional, or national, and methods employed could range from case-study to regression. Submissions employing multidisciplinary approaches are particularly encouraged. Dr. Brantley Liddle

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
