

## Special Issue

# Towards Sustainability: Spatial Models Applied to Transport and Land Use

### Message from the Guest Editors

The relations between land use and transport are key to achieving more economically, socially, and environmentally sustainable regions and cities. Without land-use planning based on criteria such as compactness, density, and diversity, it will be difficult to achieve mobility practices more oriented towards active and public transport modes that help to reduce severe problems such as congestion and pollution.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
