

Special Issue

Transportation Operations and Safety Analysis for Sustainable Networks

Message from the Guest Editor

The focus of this Special Issue is on operational and safety strategies that optimize the efficiency and safety of transportation systems and lead to sustainable communities. The purpose of the Special Issue is to provide the best theoretical and empirical practices (a toolbox) that contribute to the success of sustainable transportation networks from efficiency and safety standpoints. This Issue complements the current literature on the planning, design, and modeling of sustainable transportation systems and provides another aspect that leads to the development of successful sustainable communities.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
