

Topical Collection

Transportation Planning and Public Transport

Message from the Collection Editor

This special issue aims to bring together the emerging research on different transport models to address current and future transportation, transport economics, traffic demand, and transportation resilience. The next goal of the special issue is the expanding research on public transport systems such as shared mobility systems and transit services. We expect the submissions to make a step forward in our understanding of sustainable public transport services regarding public welfare and social needs. This special issue encourages submissions of original research articles that report significant research contributions on the following topics:

- Transport demand and travel behavior
- Route choice models and traffic assignment
- Shared mobility systems
- Public transport and interaction with other modes
- Social welfare through public transportation
- Game theory and social choice models in transportation systems
- Clean transport systems
- Transport information
- Resilience and recovery of transportation networks
- Freight transport models

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
