

Special Issue

Toward Sustainability: Transportation System Evaluation and Optimization

Message from the Guest Editor

This Special Issue focuses on the latest research conducted in the field of evaluation and optimization of transportation systems, taking into account the trends in people's mobility and goods movements. Its aim is to present findings about the sustainability of revolutionary transportation paradigms and highlight validated methodologies applied for their measurement, assessment, and evaluation. It covers topics related to the sustainability pillars (transportation, economy, environment, society) and enablers (satisfaction, acceptance, adoption, uptake). Both original research and review papers are welcome.

Guest Editor

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
