

## Special Issue

# Advancing Climate Risk Management: Strategies for Sustainability and Adaptation

### Message from the Guest Editor

This Special Issue aims to explore how climate risk management can act as a driver of sustainable development. We seek to bring together interdisciplinary perspectives and empirical research that will expand our current understanding of governance, policy, and practice in this area. The Special Issue aligns with the scope of *Sustainability* by addressing the interconnections between environmental challenges, societal responses, and pathways toward resilient and sustainable futures. In this Special Issue, original research articles and reviews are welcome. Research areas may include, but are not limited to, the following:

- Risk governance and sustainability transitions;
- Participatory and inclusive approaches to climate risk management;
- Policy integration across climate adaptation and disaster risk reduction;
- Environmental justice and equity in climate risk governance;
- Methodological and technological innovations for sustainable risk management;
- Knowledge co-production and science–policy interfaces.

I look forward to receiving your contributions.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
