

Special Issue

Sustainable Urban Mobility: Road Safety and Traffic Engineering

Message from the Guest Editors

As urban areas continue to develop, ensuring sustainable, safe, and efficient transportation systems is crucial for supporting economic vitality, reducing environmental impacts, improving road safety, and enhancing quality of life. This Special Issue on "Sustainable Urban Mobility: Road Safety and Traffic Engineering" invites research on the latest innovations, challenges, best practices, and findings in the areas of road safety and traffic engineering in relation to sustainable urban mobility. In particular, we welcome submissions that address topics such as sustainable infrastructure design, the integration of non-motorized modes, electric and public transport modes, smart infrastructure, autonomous vehicles, and novel approaches in traffic safety and monitoring. This Special Issue aims to bring together multidisciplinary insights to support the development of urban transport systems that prioritize safety, sustainability, and resilience. By contributing to this issue, researchers can help shape a safer, greener, and more accessible future for urban mobility.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
