

Special Issue

Food Security and Food Sustainability

Message from the Guest Editors

In the context of the challenges facing humanity and the planet, it is necessary to seek a balance between meeting the food needs of the world's population and producing food in a responsible as well as environmentally friendly manner. From this starting point, the objective of this Special Issue is the publication of papers under the specific theme of maintaining food security and sustainable food production, as well as the importance of scientific literacy on the part of citizens in this subject, since the lack of specific knowledge on food production by the population is scientifically evidenced, a fact that could change the consumption trends towards more responsible consumption with the environment.

In this Special Issue, original research articles and reviews are welcome. Research areas may include the following:

The production of food of animal origin in an environmentally sustainable way, not limited to but with a special emphasis on products derived from ruminants.

Food management strategies to improve the quality control and guarantee the safety of foods from sustainable systems during production.

Citizen literacy in sustainable food production.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
