

Special Issue

Innovation Management and Organizational Performance for Sustainable Future—2nd Edition

Message from the Guest Editor

In economic development and business organization, sustainability has become a key focus for scholars, policymakers, and practitioners worldwide. Innovation in products and processes drives sustainability forward, guided by the "triple bottom line" framework that considers economic, social, and environmental dimensions. Companies must balance financial performance with broader societal and ecological interests, adapting continuously to a changing environment. Recent concepts like green innovation and eco-innovation describe the innovative processes driving today's economy. While new technologies and digitalization enable greater innovation, they also present new societal challenges. This Special Issue welcomes conceptual and empirical articles exploring the relationship between innovation, performance, and sustainability across all management levels.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
