

Special Issue

Sustainable Construction and Built Environments

Message from the Guest Editors

The "Sustainable Construction and Built Environments" Special Issue focuses on advancing the knowledge and practices of sustainability in the construction and built environments sectors. It highlights innovative strategies, technologies, and materials that contribute to reducing the environmental impact of buildings and infrastructure. The Special Issue explores various topics including energy-efficient designs, the integration of renewable energy systems, sustainable building materials, and the role of green certifications. It also addresses the social and economic dimensions of sustainable construction, emphasizing how these practices can enhance the quality of life for communities while promoting long-term ecological balance. This collection of research aims to inspire policymakers, architects, engineers, and urban planners to adopt sustainable practices that foster a more resilient and environmentally conscious built environment. Through these contributions, the Special Issue underscores the importance of interdisciplinary collaboration in creating a sustainable future for construction and urban development.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
