

# Special Issue

## Sustainable Food Preservation

### Message from the Guest Editors

This Special Issue, entitled "Sustainable Food Preservation", is dedicated to exploring and advancing the field of food preservation through sustainable methods. The focus of this Special Issue is threefold: 1. to highlight innovative, environmentally friendly preservation techniques 2. to assess the impact of these methods on food quality, safety, and shelf life 3. to consider their role in reducing food waste globally The scope of this Special Issue is comprehensive, covering a range of topics from novel preservation technologies like cold plasma and pulsed light, to the use of natural preservatives and advanced packaging solutions. We aim to address both the scientific underpinnings of these methods and their practical applications in the food industry. The purpose of this Special Issue is to foster a deeper understanding of how sustainable preservation can contribute to global food security and environmental sustainability, as well as to encourage the adoption of these practices in the food industry.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
