

Special Issue

Rethinking the Accessibility and Sustainability of Public Transportation

Message from the Guest Editors

This Special Issue examines new approaches to improving the accessibility and sustainability of public transport. Current systems face challenges in balancing efficiency, inclusivity, and environmental impact. We seek to rethink existing models and develop evidence-based strategies that integrate ecological, economic, social, and institutional pillars of the sustainability. The Issue will explore innovative policies, technologies, and planning methodologies to enhance public transport's role in reducing emissions, improving affordability, and ensuring equitable access. It will also address governance frameworks that support long-term resilience and efficiency. By critically assessing current practices and identifying gaps in research, this issue aims to provide a foundation for new models of sustainable mobility. Contributions will include interdisciplinary perspectives, empirical analyses, and case studies that inform future transport policy and practice.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
