

Special Issue

Sustainable Food Systems: Innovations in Production and Waste Management for a Greener Future

Message from the Guest Editors

The global food system faces significant challenges, including climate change, resource depletion, and food waste. This Special Issue emphasizes innovative solutions to develop more sustainable food systems that are environmentally friendly, economically viable, and socially equitable. We must urgently address these challenges to ensure food security and a healthy planet for future generations. This Special Issue invites original research articles and reviews that investigate innovations throughout the food value chain, encompassing production, consumption, and waste management. We particularly welcome studies on sustainable agricultural practices, cutting-edge food processing technologies, new strategies for food waste reduction and valorization, and Circular Economy models within the food sector. The aims of this Special Issue closely align with the thematic priorities of the *Sustainability* journal.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
