

Special Issue

Cooperative, Connected, and Automated Mobility (CCAM) toward Sustainability

Message from the Guest Editor

Undoubtedly, the advent of automated mobility in contemporary society—in which the achievement of Sustainable Development Goals (SDGs) is of utmost importance—is expected to lead to radical changes in the urban transportation research field toward sustainable and environmentally friendly transportation. Public transportation in relation to urban mobility will definitely play a prominent role as we work toward attaining these SDGs, since it is considered the most environmentally friendly means of transportation, whereby a large number of passengers can be transported at once compared to transportation by private cars.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
