

Special Issue

Urban Water Metabolism and Water-Energy-Pollution Nexus

Message from the Guest Editor

Performance assessment of urban water systems is a challenging task that needs an overarching approach to model various flows and fluxes such as water, energy, materials and pollution throughout the whole system components. This usually requires a holistic view, such as a nexus approach or urban water metabolism to measure the impacts of the interactions between components. System performance can be measured through key performance indicators (KPI) of the sustainability framework usually in three main categories, i.e., economic, environmental and social aspects. This Special Issue shall include any conceptual approach or integrated modelling that can evaluate the sustainability and long-term performance of urban water systems. The performance assessment can be represented through one or more KPIs driven from the sustainability framework...

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
