

Special Issue

Urban Economics, City Development and Future Social Challenges

Message from the Guest Editors

Future forecasts about urban development are characterized by a high degree of uncertainty, depending on a future based on social fragmentation, real estate market segmentation, and increasing differentiation of demand for services and facilities. The demand for urban democracy and social justice is often based on the development of a new shared urban economy. Researchers and scholars are invited to identify and describe those factors that will represent the future driver of economy in the evolving urban environment. Colleagues are invited to submit papers that will show, hopefully, new approaches referring (though not exclusively) to the following topics: evolutionary studies on urban development, comparative analyses of urban experiences, descriptive/quantitative/qualitative modeling for real estate studies, and studies on the influence of demographic, ethnic, and social phenomena in the economy of cities of the beginning third millennium.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
