

Special Issue

Urban Ecosystem Changes and Their Social-Ecological Drivers and Effects

Message from the Guest Editors

The overlying title of the conference is “Cities as Social-Ecological Systems”. The Special Issue focuses on the ecological dimension of urban development in the view of sustainability. Among the particular objectives, the role of nature-based processes for humans’ life quality should be emphasized. Respecting the importance of ecosystems as structural elements of urban fabric is of high relevance. We highly welcome papers reflecting the values that humans apply to the green infrastructure in urban areas. We hope that the papers selected for this Special Issue will create an impactful set of publications linking the natural and social aspects of urban areas considered in light of sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
