

Special Issue

Achieving Sustainable and Resilient Urban Development: Effective Governance, Policy and Practice

Message from the Guest Editors

The overarching scope of this Special Issue, “Sustainable and Resilient Urban Development: Governance, Policy and Practice,” offers an interdisciplinary platform to explore, present, and discuss new knowledge from around the world. We invite submissions that assess and analyze not only the latest advances towards achieving the Sustainable Development Goal 11 on inclusive, safe, resilient, and sustainable cities and human settlements, but also on smart, healthy and liveable cities. Within the currently evolving context of global pandemic, we invite papers that envision cities of the future in the post Covid-19 world, with an accent on improved foresight, planning, policy and decision-making. We particularly welcome contributions that examine and/or review the latest findings and progress made with regard to the various dimensions of sustainable and resilient urban development.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits
