

Special Issue

Injustices in Urban Mobility: Understanding Place-Based Disparities and Prospects for Thriving Communities

Message from the Guest Editors

This Special Issue seeks to bring together the wide-ranging and interdisciplinary literature on place-based inequalities as they relate to mobility within urban areas. This issue will build upon existing scholarship in urban studies, geography, sociology, gender studies, and transportation studies. The purpose of the issue will be to include both articles that explore the realities of urban mobility injustices and those that also seek to offer ideas on interventions or solutions to reduce mobility inequalities and enhance community well-being. This Special Issue will provide a unique repository for multidisciplinary and multimethod work and will seek to elevate papers that speak to the social and spatial aspects of mobility. The goal of the issue is to move beyond empirical or highly technical demonstrations of inequalities and move toward a place of deeper theoretical understanding of the root causes of mobility injustices, with an eye toward potential solutions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
