

Special Issue

The Role of the Web in Smart City Evolution: AI, Applications and Services

Message from the Guest Editor

This Special Issue (SI) emphasizes on the contribution of the web (web intelligence, smart services, web applications and apps_ to smart city development. In the era of cities and under the UN 2030 Agenda for sustainable growth, cities are making an important shift regarding thinking of compact cities and develop sustainable urban services. Issues like responsive and self-evolving smart services, economy are among the topics where governments and the industry direct smart service development. Moreover, data collection and analysis enable the government's fast—or even real-time—decision-making, and new business models appear that utilize platforms and data. Additionally, new types of business in transportation appear (e.g., utilizing sensors and big data), while things' sharing is another challenge that cities have started phasing in. This SI aims to demonstrate how the Web contribute to smart city development in general.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
