

Special Issue

Urban Regeneration and Sustainable Urban Development

Message from the Guest Editors

This Special Edition addresses the theme of urban regeneration and sustainable urban development as a response to the impact of increased cities, which impose the need to control the boundaries of today's urban areas in a context that preserves the diversity and complexity of corporate globalization and the sustainability of life in urban areas. Cities are the most complex mechanisms to manage because they deal with all the complexity that results from human activities and the pressure they exert on natural resources, which requires new ideas, technological advances, and adequate responses to human needs. The focus on the role of urban regeneration and its potential for a sustainable urban development model creates the opportunity for contributions that combine theoretical reflections with case studies or applications of proof-of-concept solutions on urban regeneration to generate context for the marking of a new benchmark.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
