## **Special Issue**

# Urban Social-Ecological Systems for Sustainability

## Message from the Guest Editors

The changing climate, rapid land-use change, and the projected population increase of 2.5 billion humans over the next 25 years has created a new social-ecological paradigm in which urban and metropolitan systems are key to a sustainable future. As growing and critical dimensions of global stewardship, cities need to provide better governance of social-ecological systems both inside and outside their physical and administrative boundaries. This Special Issue is focused on Urban Social-Ecological Systems for Sustainability, and we invite papers from a range of topics that address the grand challenges for understanding the complex relationships between humans, nature, and urban systems. ## **About the Journal**

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Editor-in-Chief

#### Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

## **Author Benefits**

## **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

## **Journal Rank:**

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
