Urban and Territorial Energy Planning

Message from the Guest Editors

The energy systems (distribution networks and conversion technologies in buildings) supplying residential areas, as well as the commercial and industrial sites in cities and territories, remain poorly planned. Moreover, they are seldomly monitored and, in most cases, not foreseen to operate in a holistic fashion, as to identify the superior configurations or energy-saving and resilience-increasing synergies. Urban and territorial energy planning clearly provides a crucial set of approaches and tools making it possible to tackle the increasing complexity of modern living spaces and the challenging sustainability goals set by local authorities. This collection will gather papers dealing from multiple disciplines and with methodological approaches that are usually scattered in a multitude of journals and book chapters. It will thus provide a comprehensive and updated tool to understand this emerging field.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
