

## Special Issue

# Urban Transformations Towards Sustainability

### Message from the Guest Editor

This Special Issue will portray a comprehensive approach of urban transformations towards sustainability including inter- and transdisciplinary research. Within this project we ask for results using a wide range of different and interlinked scientific methods from social- and natural sciences in addition to models. Scenarios are being implemented to assess different options for urban transformations that reflect efficient, livable and resilient cities. Building on this, indicators, instruments and test sites (e.g., urban living labs) to pursue sustainable development strategies are highly welcome, too. The goal of this special issue is to demonstrate outstanding research in order to provide different urban stakeholders with robust knowledge.

This strongly includes context related hands-on solutions with addresses pressing questions impacting the daily life in cities (e.g., weather extremes, traffic collapse, affordable housing, migration streams, demographic change, environmental justice, urban health).

Dipl.-Ing. Raffaella Betz

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
