

Topical Collection

Sustainability in Urban Transportation Planning

Message from the Collection Editor

This Special Issue is related, but not limited, to methodologies, applications, and best practices aimed at integrating transportation systems design and management within a sustainable urban planning framework. This could include planning and operating traditional transport modes in a sustainable perspective (e.g., with the implementation of energy-saving strategies in railway systems) and by promoting new forms of transport, namely shared mobility, electric vehicles, cooperative driving, PT-Maas etc. Technical tools required for this purpose include simulation techniques, optimisation procedures, artificial neural networks (ANNs), data-driven approaches etc. Original works in this context, as well as review papers, are strongly encouraged.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
