

## Topical Collection

# Urban Water Consumption and Sustainability

### Message from the Collection Editor

The studies of the Special issue are expected to address one of the following issues:

- The development of water consumption in urban areas and associated developments such as waste water and water-related environmental pollution.
- Drivers of urban water consumption and associated developments such as waste water discharge and environmental pollution.
- Rural-urban interactions with respect to availability of water for consumption in urban areas.
- Economic and environmental assessments of technological solutions to reduce the environmental impact of water consumption in urban areas.
- Assessment of supply and demand for water in urban areas such as competing claims, water markets, water pricing, payment for environmental services etc.).
- New challenges such as the emerging issues of medicine residues in waste water, water reuse opportunities etc. related to urban water consumption.

### Keywords

- urban water consumption
- environmental pollution
- water markets
- water pricing
- urbanization

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
