

# Special Issue

## Urban Water Supply Systems

### Message from the Guest Editors

The aim of this Special Issue is to present the current state of knowledge on Urban Water Supply Systems. Currently, scientific methods are widely implemented in the water supply systems operation. Water network managers are increasingly aware of the benefits of implementing models and various procedures. Hydraulic and GIS models and their use in the aspect of water failure risk analysis are becoming more and more popular. Large water companies are implementing Water Safety Plans, while smaller companies are often just starting preparations for implementation. In this Special Issue, articles relating to the issue of hydraulic modeling, failure analysis, and costs of functioning of collective water supply systems are expected. We also expect articles describing the implementation of Water Safety Plans, as well as others describing modern ways to improve the functioning of Urban Water Supply Systems. This Special Issue aims to collect in one place the best publications related to Urban Water Supply Systems, which would be helpful for people managing municipal water companies.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
