

## Special Issue

# Sustainable Urbanism and Architecture

### Message from the Guest Editors

Interventions in the urban environment are the result of an integrated blend of urbanism and architecture—the design framework for reinventing the development models of societies. The opportunity to rethink and reinvent the city revolves around the development of more social and shared spaces in the city, using urbanism and architecture to deal with numerous issues, such as the climate, energy, water, and local materials and their reuse, as well as the improvement of mobility through smart zoning and the promotion of the circular economy in which efforts to reduce, reuse, and recycle are prioritized. Another theme is the role of sustainability in the built environment, which can be increased through its assessment by using certification systems that allow us to estimate the level of efficiency and sustainability that must be achieved during the pre-design process and after the implementation of a project. This Special Issue welcomes articles that discuss challenges to and opportunities for the implementation of sustainable urbanism and architecture, in all its aspects.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
