# **Special Issue**

# Research on Sustainability and Industry 4.0/5.0 Technologies: Circular Economy

# Message from the Guest Editors

Circular economy represents the integration of economic activity and the good state of the environment in a sustainable way. This is achieved through the use of advanced technologies, innovation, and development in processes and models linked to the Industry 4.0/5.0 paradigm. In this Special Issue, original research articles and reviews are welcome to be submitted. Research areas may include, but are not limited to, the following: 1. Continuous improvement in the sustainability of final products for the environmental, social, and economic dimensions of sustainability. 2. Study of the choice and degree of implementation of 4.0/5.0 tools in industry and their relationship with the degree of sustainability of industry.3. Analysis of the results in industry by the application of circular economy models. 4. Relationship between the circular economy and sustainability in industry: quantitative parameters and qualitative analysis. 5. Analysis of the relationships between industry 4.0/5.0, circular economy, and sustainability. We look forward to receiving your contributions.
