Disruptive Technologies and Sustainable Value Creation: A Roadmap for the Future

Message from the Guest Editors

To initiate the call for papers for our Special Issue entitled "Disruptive technologies and sustainable value creation", let us ask a question: "What are the allies and foes of sustainable value creation and disruptive technology? Given this context, how can we (re)define disruptive innovations to integrate some or all of the UN 17 Sustainable Development Goals into their creation and implementation process? Is disruption a lever for sustainability or an impairment? Finally, what remains to be done to see this melding reach its full potential? For this Special Issue, we invite submissions that reflect the spectrum of Sustainable Value Creation and Disruptive Technology stakeholders. Research areas may include (but are not limited to) the following:

- Economics of disruption and sustainability
- Multidisciplinary technologies
- Social impacts and barriers to the adoption of disruptive technologies
- Environmental impact and life-cycle evaluation of disruptive solutions
- Evolution of social policies to account for sustainability and disruption

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
